Tools for website owners & admins

Besides UI solutions, we want to support admins in their difficult task of maintaining a healthy website and growing its traffic, conversions and overall effectivity. We're handing over a bunch of free tools that'll help you with that, among those are:

Web Push Notification creator [BETA]

With our web push editor you're able to create, customize and send your own Web Push Notifications directly to your website visitors. It's one of the most effective ways of reaching your audience (16 times more effective than email messages), and besides that it's just an elegant & subtle medium for website-user communication.

Marketing automation software (remote code injection) [BETA]

Dynamic content (content displayed based on user behavior) is one of the sophisticated tactics of constructing User Experience. The most respected IT players on the world like Amazon or Facebook used it to reach the top. Now it's no longer reserved for the giants, as you can create and implement your own automation algorithms with a user-friendly, intuitive interface. Trigger modals, recover abandoned carts and create a website which learns about your user - you can do all of that and more right now!
